

Examples of studies and research on probiotics and the immune system

Fukushima Y, Kawata Y, Hara H et. Al. Effect of a probiotic formula on intestinal immunoglobulin A production in healthy children. *Int J Food Microbiol* 1998; 42: 39-44.

Isolauri E, Arvola T, Sutas Y et. al. Probiotics in the management of atopic eczema. *Clin Exp Allergy* 2000; 30: 1604-10.

Mohan R, Koebnick C, Schildt J, Mueller M, Possner M, Radke M, Blaut M. Effects of *Bifidobacterium lactis* (Bb 12) supplementation on weight gain, fecal short chain fatty acids, lactate, calprotectin, sIgA and intestinal microbiota in preterm infants – a randomized, placebo-controlled double-blind trial. *J Microbiol*, 2006.

Saavedra JM, Bauman NA, Oung I et. al. Feeding of *Bifidobacterium bifidum* and *Streptococcus thermophilus* to infants in hospital for prevention of antibiotics-associated diarrhea in infants. *Lancet* 1994; 344: 1046-9.

Correa N, Filho L, Penna F, Lima F, Nicoli J. A randomised formula controlled trial of *Bifidobacterium lactis* and *Streptococcus thermophilus* for prevention of antibiotics-associated diarrhoea in infants. *J Clin Gastroenterol Nutr* 2004; 38: 288-92.

Chouraqui JP, Fichot MC, Van Egroo LD. Acidified milk formula supplemented with *Bifidobacterium lactis*-Impact in infant diarrhea in residential care settings. *J Pediatr Gastroenterol Nutr* 2004; 38: 288-92.

Weizman Z, Asli G, Alsheikh A. Effects of Probiotic Infant Formula on infections on Child Care Centers: comparison of two probiotic agents. *Pediatrics* 2005; 115: 5-9.

Examples of studies and research on LC-PUFAs and biological and immunological functions

Sellmayer A, Koletzko B. Long-chain polyunsaturated fatty acids and eicosanoids in infants: physiological and pathophysiological aspects and open questions. *Lipids* 1999, 34: 199-205.

Calder PC. Polyunsaturated fatty acids, inflammation, and immunity. *Lipids* 2001; 36:1 007-24.

Calder PC. N-3 polyunsaturated fatty acids and inflammation: from molecular biology to the clinic. *Lipids* 2003; 38: 343-52.

Connor WE, Neuringer M and Reischick S. Essential fatty acids: the importance of n-3 fatty acids in the retina and brain. *Nutr Rev* 1992; 50:21-9.

Harbige LS. Fatty acids, the immune response and autoimmunity: a question of n-6 essentiality and the balance between n-6 and n-3. *Lipids* 2003; 38: 323-41.

Makrides M, Neumann MA, Simmer K et al. Dietary long-chain polyunsaturated fatty acids do not influence growth of term infants: a randomized clinical trial. *Pediatrics* 1999; 104: 468-75.
